1957 SUPPLEMENT
TO
1956 *Arm-Roy* ORCHID PLANT CATALOGUE

We wish to thank all of our customers for the splendid response we received from our 1956 Arm-Roy Orchid Plant Catalogue. This Supplement is to acquaint you with changes in sizes and varieties, and to bring to your attention some new seedling crosses.

In a majority of the listings the change is only in pot sizes. Also some items are sold out. When ordering it will save time if you will refer to this supplement list to determine if what you wish to order is available.

We are now growing a large percentage of our plants in Fir Bark. We are listing some bare root stock, mostly in seedling size. As our mature plants need repotting they are being shifted into Fir Bark. In the near future plants will be avail-

able bare root or in pots. For those who are not using Fir Bark, or it is not available to you, we still maintain a stock of plants in Osmunda.

As always we will give prompt and careful attention to your orders, large or small. We are always striving to supply the very highest quality plants. For Forty Years the name ARM-ROY has been synonymous with Highest Quality in Orchid Plants.

When ordering please use prepaid order blank enclosed with this supplement. If you are no longer interested in orchids we will appreciate it if you will so advise us on the order blank so that we can remove your name from our mailing list. This will take only a minute of your time and will enable us to save on our mailing costs.

CATTLEYAS

THE FOLLOWING NEW CROSSES ARE OFFERED IN BARE ROOT SEEDLINGS. 1½" Pot size. \$1.50 each.

- #A-262. LC. DOROTHY FRIED X LC. GITCHE MANITO.
Lc. Dorothy Fried has bred some outstanding hybrids. The combination of this on Lc. Gitche Manito is indeed a happy one. Lavender. Summer season.
- #A-283. C. NETTIE TIPTON X C. ALICE BELDING.
C. Alice Belding is a very free flowering Alba of good shape. Introduction of C. Nettie Tipton will improve substance and keeping qualities. White with colored lip. Late Spring and Summer.
- #A-276. LC. MORRO ROCK V. STORM CLOUD X C. LABIATA V. SAMPSON.
Here is a very good controlable cross. It should produce some very good medium to dark lavender flowers. Normal season late Fall.
- #A-292. LC. TAHOE V. SUNSET X LC. MEM. WALTER L. ARMACOST #265.
These parents are both Winter blooming. Superb forms of each were used. Should produce medium to dark lavender flowers of good form and substance. Rich lavender lip with yellow gold throat.
- #A-295. LC. MEM. WALTER L. ARMACOST X C. LABIATA VAR. HERCULES.
This is another good controlable Cross. C. Labiata V. Hercules is a terrific grower and prolific bloomer. Lavender flowers of good shape and substance. Normal season is late Fall.
- #A-308. BLC. PASTEL, #271, X C. PEARL HARBOR V. BUNKER HILL.
This is a speculative cross. Blc. Pastel is not a pure white Brasso, but it is as near white as we have seen. Flowers should be of very good shape and substance with interesting pastel color tones, some with a dark lavender splotch on the tip of the lip.
- #A-324. C. WHITE SAIL X C. BOB BETTS V. CAMERON.
Here is a good commercial as well as exhibition type. C. White Sail is a prolific bloomer. C. Bob Betts V. Cameron is one of the most prolific C. Bob Betts we have seen. Season late Fall.
- #-325. C. ESTELLE ALBA V. CYNOSURE X C. BOB BETTS V. CAMERON.
This is indeed a good cross. It should produce some very fine exhibition type flowers. Season Winter.
- #A-328. C. REMY CHOLET V. VIVICANS X LC. MEM. WALTER L. ARMACOST V. STEAD-FAST.
Should be medium to dark lavender flowers, vigorous grower, and very free flowering. Season late Fall to Winter.

The following is offered in 1½" pot size growing in Osmunda. \$1.75 each.

- #A-245. C. BOB BETTS X C. CLAESIANA.
Medium size whites of the cluster type. Good shape and substance. There is much interest shown in this type of flower and we feel that it will be very popular. Season Winter.
